

CITY OF SUNNYSIDE

2016 WATER SYSTEM PLAN

CONTENTS

Chapter 1 : Description of Water System	1
1.1 Introduction	1
1.2 Brief Inventory of Existing System	1
1.3 Ownership and Management	3
1.4 Service Area Characteristics.....	4
1.5 City Codes and Related Plans / Local Government Consistency.....	9
1.6 Duty to Serve.....	10
1.7 Satellite Management Information	11
Chapter 2 : Basic Planning Data	12
2.1 Introduction	12
2.2 Population.....	12
2.3 Existing Water Consumption	13
2.4 Equivalent Residential Units (ERUs).....	17
2.5 Water Production.....	19
2.6 Service Area Demand Projections.....	22
2.6.1 Pressure Zones 2 and 3 Projections	25
Chapter 3 : System Analysis.....	26
3.1 Introduction	26
3.2 System Design Standards.....	26
3.2.1 Supply.....	26
3.2.2 Storage	26
3.2.3 Distribution	28
3.3 System Inventory	29
3.3.1 Source	32
3.3.2 Treatment	36
3.3.3 Storage	36
3.3.4 Booster Pump Station	40
3.3.5 Pressure Zones	43
3.3.6 Distribution System.....	45
3.3.7 Distribution System Leakage.....	46
3.3.8 Control System.....	46

3.4	System Capacity Analysis	46
3.5	Water Quality Analysis.....	49
3.5.1	Source Monitoring	49
3.5.2	Distribution System Monitoring.....	50
3.5.3	Recent and Possible Future Water Quality Regulation Changes	51
3.6	Summary of System deficiencies	51
3.7	Analysis of possible improvement projects	51
3.7.1	Additional Water Supply Alternatives.....	51
3.7.2	Additional Storage Alternatives	52
Chapter 4 : Water Resources Analysis and Water Use Efficiency		53
4.1	Metering Program.....	53
4.1.1	Source Meters.....	53
4.1.2	Service Meters	53
4.1.3	Bulk Water Uses.....	53
4.1.4	Water Rate Structure Evaluation	53
4.2	Water Use Efficiency (WUE) Program.....	55
4.2.1	WUE Goal	55
4.2.2	WUE Measures.....	55
4.3	Distribution System Leakage (DSL)	57
4.4	Water Rights Self-Assessment	57
4.4.1	Existing Water Rights	57
4.4.2	Surface Water Option	58
4.5	Source of Supply Analysis	62
4.5.1	Water Supply Reliability.....	62
4.5.2	Water Supply Alternatives	63
Chapter 5 : Source Water Protection		65
5.1	Wellhead Delineation	65
5.2	Potential Contaminate Source Inventory	65
5.3	Spill Response and Contingency Planning	65
5.4	Management Recommendations	65
Chapter 6 : Operation and Maintenance Program		69
6.1	System personnel.....	69
6.1.1	Professional Growth.....	69
6.2	Routine Operations & Maintenance Summary.....	70
6.3	Cross-Connection Control Program	73
6.4	Customer Complaint Program	73

6.5	Water Quality Monitoring.....	73
6.6	Sanitary Surveys.....	74
6.7	Emergency Response Planning	74
6.7.1	Key Components	74
6.7.2	Vulnerability Assessment and Response Plan.....	75
6.8	Safety	75
6.9	Customer Notifications	75
6.10	Recordkeeping & Reporting.....	75
6.11	Summary of Operations & Maintenance Deficiencies and Action Plan.....	76
6.11.1	Areas needing attention	76
Chapter 7 : Standard Design & Construction Standards		78
Chapter 8 : Improvement Programs		79
8.1	Capital Improvement Plan	79
8.2	Planning Improvement Plan.....	81
8.3	Operations and Maintenance Improvement Program	86
8.4	Additional Recommendations.....	86
Chapter 9 : Financial Program.....		88
9.1	Recent Financial Condition	88
9.2	Rate Fees and Charges	88
9.3	System Liabilities.....	90
9.4	Annual Budget.....	90
9.5	Funding Alternatives	90
